

SUBSTITUTE SPECIFICATION

1 ABSTRACT OF THE DISCLOSURE

2 A decorative external curtain assembly is disclosed for applying decorative
3 fabric material to an external facade of a building, the assembly comprising: a
4 sheet of fabric material having top and bottom edges; and complementary
5 engageable fastener strips respectively affixed to the sheet of fabric material and
6 the external facade of the building for fastening at least one edge of the fabric
7 material to the external facade of the building. The engageable fastener strips
8 are preferably made of VELCROTM Tape having co-acting miniature hooks and
9 loops formed of relatively rigid filament material for fastening the fabric material
10 to the external facade of the building.
